

Turkish Ornamental Plants

Türkiye is a country that is optimally situated for ornamental plant production. It has many advantages for a prospering horticultural sector, like having a favorable climate for production of cut flowers, geographical proximity to the main markets, production in modern greenhouses and cheap and skilled labor.

Flower exports from Türkiye began 30 years ago, and the sector has grown steadily since then. Turkish exporters are taking good advantage of the geographical location of Türkiye and of the proximity to the large consumption markets in Europe and elsewhere. Turkish flowers are exported to 77 countries.

Live Plants, including outdoor and indoor plants account for 56% of Turkish ornamental plant exports, whereas cut flowers account 33%. The production in the highland area allows to export flowers year round to the markets.

Meet best quality and price
